# Monarch™

## Safety Tray

---

***Thank You and Congratulations*** on your purchase of the Monarch Safety Tray. The tray, made of resistant polypropylene, provides a convenient system for cleaning instruments in the dental clinic, practice and laboratory settings.

Features Include:

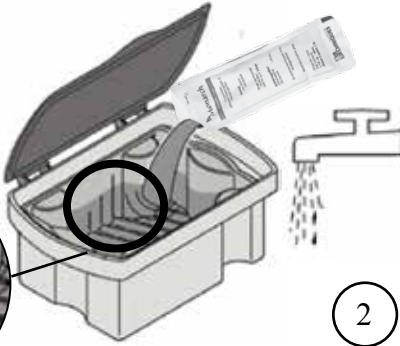

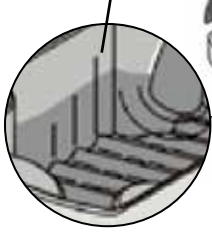

- Safety Tray made of resistant polypropylene.
- Filling indicators 1, 2 and 3 quarts (liters).
- Ergonomically shaped carrying handles to enable box to be carried safely.
- Tilt resistant draining position for the sieve insert.
- Specially shaped slits allow complete draining and prevent the instruments from becoming entangled.
- Easy care because of machine washable materials.

## Directions for Use:

- 1 Pour 1.7 oz. (50 mL) pouch of Monarch Enzymatic Cleaner into box and add water to bring to the 3 quart (liter) level.

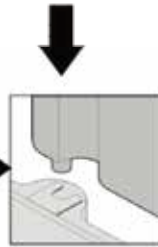

3 quart (liter)  
level indicator

- 2 Make sure that all instruments are covered. Allow to sit for at least 10 minutes.

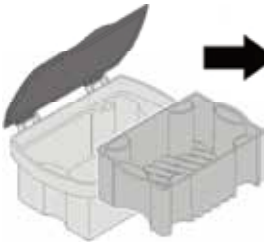

3

Raise the basket from the box and allow to drain.

- 4 Empty used cleaning solution and thoroughly rinse the box basket and lid.

**Note:** Make sure that rinse water is no more than 140° F (60° C).
