# Vision Monitor: Real-time Monitoring

Vision Monitor brings valuable information from your critical dental equipment directly to those who need to see it. Through cloud based IoT monitoring, get live status updates, device messages and the ability to provide remote support and configuration. Whether you are managing equipment from a single office or 200 or more offices, Vision Monitor has features to ensure your equipment will quickly, and easily notify you with detailed, relevant information.

## Intelligence, Simplified

- **SPECIFIC:** Don't get lost in charts and information overload. Vision monitor provides clear, pertinent information for you to keep your equipment running.

- **SCALABLE:** Whether you are monitoring a single office, or 200 or more, Vision Monitor can support your needs.

- **SECURE:** Encryption and data security up to highest industry standards

- **SENSIBLE:** No additional hardware required!  Use the existing assets in your office to connect your devices to the cloud.*

*No additional hardware required to connect to Vision Monitor on equipment with an existing network connection.   Connect Box required to monitor legacy equipment.

# Core Features

## IoT CONDITION MONITORING

• Make your equipment work for you.  Through persistent monitoring you can be confident your utility room will remain operational and maximize your ROI.

• Connect your equipment to an authorized service organization so they also know the moment an issue arises.

## INTELLIGENT ALERTS AND NOTIFICATIONS

• Alerts and notifications are reported immediately via the web interface, mobile app, email, and/or webhook.

• Clear and actionable notifications provide detailed status and instructions to ensure potential problems are immediately addressed.
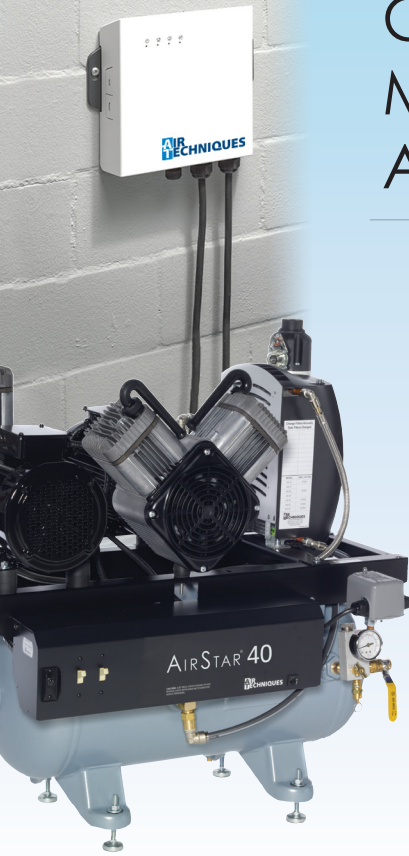

## ACCESS YOUR EQUIPMENT ANYTIME, ANYWHERE

• Bring intelligence and reliability to the Equipment Room with a cloud based intuitive, secure and user-friendly interactive platform accessible 24/7.

• Securely review and modify essential equipment parameters remotely.

# Connect Box: Monitor ALL your Air Techniques Equipment

- Have ALL of your critical utility equipment connected to the cloud!  Monitor both your legacy and network enabled equipment through Vision Monitor to maximize uptime.

- Are you a service organization or DSO? Connect your entire network of equipment to the cloud.  Keep your offices running and efficiently schedule maintenance for multiple offices before revenue effecting problems arise.

- Wi-Fi enabled.  Connect your devices to a wireless network to simplify setup.

- Detect common signs of high wear and necessary service - reduce the risk of unexpected downtime.

## How Can I Connect My Equipment?

| Device Series | Ready | Connect Box | Upgradeable |
|---|---|---|---|
| AirStar NEO | ✓ | | |
| AirStar | | ✓ | |
| Mojave Monitor (Example: V3M, V5M, V7M) | ✓ | | |
| Mojave (Example: V3, V5, V7) | | ✓ | ✓ |
| Mojave Monitor LT (Example: LT3M, LT3, LT5M, LT5) | ✓ | | |
| VacStar NEO | | ✓ | |
| VacStar | | ✓ | |
